# Report of the directors

For the year ended 31 December 2020

The Directors present their report and the financial statements of the Company for the year ended 31 December 2020.

## Directors' responsibility statement

The Directors are responsible for the preparation of financial statements that give a true and fair view of Quantum Terminals PLC, comprising the statements of financial position at 31 December 2020, and the statement of comprehensive income, changes in equity and cash flows for the year then ended, and the notes to the financial statements which include a summary of significant accounting policies and other explanatory notes, in accordance with International Financial Reporting Standards and in the manner required by the Companies Act, 2019 (Act 992). In addition, the Directors are responsible for the preparation of the report of the Directors.

The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and for maintaining adequate accounting records and an effective system of risk management.

The Directors have made an assessment of the ability of the Company to continue as a going concern and have no reason to believe that the businesses will not be a going concern in the year ahead.

## Nature of business/ principal activities

The Company is registered to build, own and operate petroleum tank farms in Ghana, and also to process and blend petroleum products. There was no change in the nature of business of the Company during the year.

## Objectives of the company

The objective(s) of the company is to construct and manage petroleum tank farms.

## **Holding company**

The Company is a wholly owned subsidiary of the Quantum Terminals Group Limited, a company incorporated in Ghana. Its ultimate parent is Arch Holding Limited.

## Subsidiaries of the company

The Company does not directly or indirectly own any subsidiary as at 31 December 2020

#### Role of the board

The directors are responsible for the long-term success of the Company, determination of the strategic direction of the Company and review of the operating, financial and risk performance of the Company. There is a formal schedule of matters reserved for the board of directors, including approval of the Company's annual business plan, strategy, acquisitions, disposals and capital expenditure projects above certain thresholds, all guarantees, treasury policies, the financial statements, the Company's dividend policy, transactions involving the issue or purchase of company shares, borrowing powers, appointments to the Board, alterations to the regulations,

## Report of the directors - continued

For the year ended 31 December 2020

legal actions brought by or against the Company, and the scope of delegations to Board committees, subsidiary boards and the management committee.

Responsibility for the development of policy and strategy and operational management is delegated to the executive director and the management team, which as at the date of this report includes the executive director and five (5) senior managers.

### **Internal control systems**

The directors have overall responsibility for the Company's internal control systems and annually reviews their effectiveness, including a review of financial, operational, compliance and risk management controls. The implementation and maintenance of the risk management and internal control systems are the responsibility of the executive director and other senior management. The systems are designed to manage rather than eliminate the risk of failure to achieve business objectives and to provide reasonable, but not absolute, assurance against material misstatement or loss. The directors have reviewed the effectiveness of the internal control systems, including controls related to financial, operational and reputational risks identified by the Company as at the reporting date and no significant failings or weaknesses were identified during this review.

## **Directors' performance evaluation**

Every year the performance and effectiveness of the Board of Directors ("the Board), its committees and individual directors are evaluated. The results of the evaluation is shared with all members of the Board. Overall, it was noted that the board of directors and its committees were operating in an effective manner and performing satisfactorily, with no major issues identified.

#### **Conflict of interest**

The Company has established appropriate conflict authorisation procedures, whereby actual or potential conflicts are regularly reviewed and authorisations sought as appropriate. During the year, no such conflicts arose and no such authorisations were sought.

## **Board balance and independence**

The composition of the board of directors and its Committees is regularly reviewed to ensure that the balance and mix of skills, independence, knowledge and experience is maintained. The Board considers that the Chairman is independent on appointment and all non-Executive Directors are independent as it pertains to the management of the company. The continuing independent and objective judgement of the non-Executive Directors has been confirmed by the Board of Directors

#### Professional development and capacity building of directors to discharge their duties

On appointment to the Board, directors are provided with a full, formal and tailored programme of induction, to familiarise them with the Company's business, the risks and strategic challenges it faces, and the economic, competitive, legal and regulatory environment in which the Company operates.

A programme of strategic and other reviews during the year, together with other trainings provided from time to time, ensures that directors continually update their skills, their knowledge and familiarity with the Company's business, and their awareness of sector, risk, regulatory, legal, financial and other developments to enable them to fulfil effectively their role on the Board and committees of the Board.

# Report of the directors - continued

For the year ended 31 December 2020

#### Auditors and audit fees

Messrs. Deloitte & Touche have indicated their willingness to remain in office as auditors of the company and in accordance with Section 139 of the Companies Act, 2019 (Act 992). The Directors have agreed an audit fee of  $GH \not= 115,000$  with the auditors for the 2020 audit (2019:  $GH \not= 150,000$ ).

## Approval of the financial statements

# **Independent auditor's report**To the members of Quantum Terminals PLC

## Report on the Audit of the Financial Statements

#### Opinion

We have audited the financial statements of Quantum Terminals PLC, set out on pages 14 to 66, which comprise the statement of financial position at 31 December 2020 and the statements of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies and other explanatory disclosures.

In our opinion, the financial statements give a true and fair view of the financial position of Quantum Terminals PLC as at 31 December 2020, and its financial performance and cash flow for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act, 2019 (Act 992).

### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the requirements of the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and other independence requirements applicable to performing audits of financial statements in Ghana. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and other ethical requirements that are relevant to our audit of financial statements in Ghana.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, we do not provide a separate opinion on these matters.

The key audit matter noted below relate to the financial statements.

#### Key audit matter: Revenue

The Company generates revenue from storage service and rack loading services. The Company depends solely on a related party, for all its revenues.

The relationship between the Company and its related party poses an opportunity for management to inappropriately recognise revenue to show a favourable financial performance.

Given the significance of the amount generated as revenue from the related party who is also a sole customer, we consider recognition of revenue as a key audit matter.

### How our audit addressed the key audit matter

We evaluated the design and tested the implementation of the key controls over the computation of impairment loss.

In evaluating the design of controls, we considered the appropriateness of the control considering the nature and significance of the risk, competence and authority of person(s) performing the control, frequency and consistency with which the control is performed.

- Agreeing underlying documents in support of revenue to the recorded amount in the general ledger.
- Re- computing revenue recognised in the year taking into consideration the volume of Liquefied Petroleum Gas stored and the agreed prices.
- Performing procedures to ensure revenue was recorded in the appropriate accounting period.

Evaluating the adequacy of the Company's disclosures on revenue recognition in the financial statements in accordance with the applicable financial reporting framework.

#### Other Information

The directors are responsible for the other information. The other information comprises the Report of the Directors, which we obtained prior to the date of this auditor's report. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Other Matter

The financial statements for the year ended 31 December 2019 were audited by another auditor who expressed an unmodified opinion on those financial statements on 15 May 2020. We do not express an opinion or any other form of assurance on the 31 December 2019 financial statements as a whole.

### Responsibilities of the Directors for the Financial Statements

The Directors are responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards and in the manner required by the Companies Act, 2019 (Act 992), and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

#### Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit.

## We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of
  expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance we determine those matters that were of most significance in the audit of the financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Report on Other Legal and Regulatory Requirements

In accordance with the Seventh Schedule of the Companies Act, 2019 (Act 992) we expressly state that:

- 1. We have obtained the information and explanations, which to the best of our knowledge and belief were necessary for the purpose of the audit.
- 2. In our opinion:
  - proper books of accounts have been kept by the Company, so far as appears from our examination of those books.
  - the information and explanations given to us, were in the manner required by the Companies Act, 2019 (Act 992) and give a true and fair view of the:
    - a. statement of financial position of the Company at the end of the financial year, and
    - b. statement of comprehensive income for the financial year.

- 3. The Company's statement of financial position and statement of comprehensive income are in agreement with the accounting records and returns.
- 4. We are independent of the Company, pursuant to Section 143 of Act 992.

The engagement partner on the audit resulting in this independent auditor's report is **Emmanuel Martey (ICAG/P/1476).**

The notes on pages 21 to 66 are an integral part of these financial statements.

# Notes to the financial statements

For the year ended 31 December 2020

## 1. Reporting entity

Quantum Terminals PLC is incorporated in Ghana under the Companies Act 1963 (Act 179), replaced by the Companies Act, 2019 (Act 992) as a Public Limited Company and is domiciled in Ghana. The address of the company's registered office and principal place of business can be found on page 2 of the report. The company is primarily involved in the building, ownership and operation of petroleum tank farms in Ghana and also in the processing and blending of petroleum products.

The Company has issued a bond that is listed on the Ghana Stock Exchange.

## 2. Basis of preparation

## a. Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) and in the manner required by the Companies Act, 2019 (Act 992).

#### b. Basis of measurement

These financial statements have been prepared on the historical cost basis except for some classes of property, plant and equipment which are measured on revaluation basis and some financial instruments which are carried at fair value.

#### c. Functional and presentation currency

These financial statements are presented in Ghana cedis (GH¢) which is the company's functional currency. All amounts have been rounded to the nearest Ghana cedi, unless otherwise indicated.

#### d. Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make estimates, judgements and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses. Estimates and underlying assumptions are based on historical experience and other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised, if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

# Notes to the financial statements

For the year ended 31 December 2020

## d. Use of estimates and judgments (Cont'd)

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to carrying amounts of assets and liabilities in the year ending 31 December 2019 is set out below and in the following note:

Note 20(i) – measurement of expected credit loss allowance for trade receivables and amount due from related parties; key assumptions in determining the weighted-average loss rate.

Note 12- determining the fair value of some classes of property, plant and equipment.

## 3. Changes in significant accounting policies

The Company has initially applied IFRS 16 from 1 January 2019. A number of other new standards are also effective from 1 January 2019, but they do not have a material effect on the Company's financial statements.

The Company applied IFRS 16 using the modified retrospective approach under which the cumulative effect of initial application is recognised in retained earnings at 1 January 2019. Accordingly, the comparative information presented for 2018 is not restated –i.e. it is presented as previously reported under IAS 17 and related interpretations. The details of the changes in accounting policies are disclosed below. Additionally, the disclosure requirements in IFRS 16 have not generally been applied to comparative information.

## a) Definition of a lease

Previously, the Company determined at contract inception whether an arrangement was or contained a lease under IFRIC 4 Determining whether an Arrangement contains a Lease. The Company now assesses whether a contract is or contains a lease based on the definition of a lease as explained in Note 4(e).

On transition to IFRS 16, the Company elected to apply the practical expedient to grandfather the assessment of which transactions are leases. The Company applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed for whether there is a lease under IFRS 16. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed on or after 1 January 2019.

## b) As a lessee

As a lessee, the Company mainly leases property. The Company previously classified as operating, or finance leases based on its assessment of whether the lease transferred significantly all the risks and rewards incidental to ownership of the underlying asset to the Company. Under IFRS 16, the Company recognises right-of-use assets and lease liabilities for most of these leases –i.e. these leases are on-balance sheet.

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone price.

Right-of-use assets are measured at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the statement of financial position immediately before the date of initial application.

## Notes to the financial statements

For the year ended 31 December 2020

## b) As a lessee (Cont'd)

The Company used a number of practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17. In particular, the Company

- did not record a lease liability or right-of-use asset for leases with a remaining term of less than 12 months as at 1 January 2019
- used hindsight in determining the lease term
- exclude initial direct cost from the measurement of the right-of-use asset at the date of initial application

#### Impact on transition

On transition to IFRS 16, the Company recognised additional right-of-use assets and additional lease liabilities. The impact on transition is summarised below.

In Ghana cedis
Right-of-use assets – property, plant and equipment
Prepayment
Lease liabilities

The lease liabilities for leases that were classified as operating leases represent undiscounted accrued lease at 1 January 2020.

The Company has presented right-of-use of asset that do not meet the definition of investment property within property, plant and equipment.

The Company has tested its right-of-use assets for impairment on the date of transition and has concluded that there is no indication that the right-of-use assets are impaired.

#### 4. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements, except if mentioned otherwise.

## (a) Foreign currency transactions

Transactions in foreign currencies are translated into the functional currency (GH¢) of the Company at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the exchange rates prevailing on the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated to the functional currency at the exchange rate when the fair value was determined. Foreign currency differences are generally recognized in profit or loss. Non-monetary items that are measured based on historical cost in a foreign currency are translated using the spot exchange rate at the date of the transaction.

Foreign currency gains and losses are reported on a net basis under general and administrative expenses or other income. However, net foreign exchange gains on loans and borrowings are recognized as part of the net finance cost.

# Notes to the financial statements

For the year ended 31 December 2020

## (b) Financial instruments

## (i) Recognition and initial measurement

Trade receivables issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

## (ii) Classification and subsequent measurement

#### Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI-debt investment; FVOCI-debt investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes

its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at  $\mathsf{FVTPL}$ 

- it is held within a business model whose objective is to hold assets to collect contractual cash flows;
   and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

## Notes to the financial statements

For the year ended 31 December 2020

### (ii) Classification and subsequent measurement (cont'd)

Financial assets - Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice.
  - These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated- e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets -Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment. 'principal' is defined as the fair -value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time -value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

## Notes to the financial statements

For the year ended 31 December 2020

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual paramount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination is treated as consistent with this criterion if the fair –value of the prepayment feature is insignificant at initial recognition.

Financial assets - Subsequent measurement and gains and losses

Financial assets at amortized cost – These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost. The Company's financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

#### (iii) Derecognition

#### Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial assets are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

## Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

## (iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

## **Notes to the financial statements**

For the year ended 31 December 2020

## (c) Impairment

## (i) Non-derivative financial assets

The Company recognises loss allowances for expected credit losses (ECLs) on financial assets measured at amortised cost.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for amounts due from related parties which are measured at 12-month ECLs.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by
  - the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

## Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

#### Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit- impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

## Notes to the financial statements

For the year ended 31 December 2020

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

#### Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

#### (ii) Non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax asset) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets. The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell.

An impairment loss is recognized if the carrying amount of an asset exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

## (d) Property, Plant and Equipment

## (i) Recognition and measurement

Property, plant and equipment are carried at revalued amounts less subsequent accumulated depreciation and any accumulated impairment except for motor vehicles which are carried at cost less accumulated depreciation and any accumulated impairment. The fair values are determined every three (3) years by external, independent, professional valuers. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

## Notes to the financial statements

For the year ended 31 December 2020

An increase in the carrying amount of the asset as a result of revaluation is recognized in other comprehensive income and accumulated in equity under revaluation reserve.

However, a decrease in the carrying amount of the asset as a result of revaluation is recognized in profit or loss. The decrease is recognized in other comprehensive to the extent of any credit balance existing in the revaluation reserve in respect of that asset.

Subsequent to revaluation, relevant portions of the revaluation reserve is transferred to retained earnings as the asset is depreciated, with the balance being transferred on ultimate disposal.

The cost of self-constructed assets includes the cost of materials and direct labour, capitalised borrowing costs and any other costs directly attributable to bringing the asset into a working condition for its intended use. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment. When parts of an item of property, plant and equipment have different useful lives they are accounted for as separate items (major components) of property, plant, and equipment.

Any gain or loss on the disposal of an item of property, plant and equipment is recognized in profit or loss

### (ii) Subsequent costs

The cost of replacing part of an item of plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss, as incurred.

#### (iii) Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of an asset or other amount substituted for cost, less its residual value.

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Leased assets are depreciated over the shorter of the lease term and their useful lives of the right of use assets. Owned undeveloped land is not depreciated

The estimated useful lives for the current and comparative periods are as follows:

Buildings - 50 years
Right of Use Assets - 2-50 years
Motor Vehicles - 3 years
Furniture and Fittings - 2-5 years
Civil Works - 50 years
Plant and Machinery - 2-25 years

Depreciation methods, useful lives, and residual values are reassessed at each reporting date and adjusted if appropriate.

#### (e) Leases

The Company has applied IFRS 16 using the modified retrospective approach and therefore the comparative information has not been restated and continues to be reported under IAS 17 and IFRC 4. The details of accounting policies under IAS 17 and IFRIC 4 are disclosed separately if they are different from those under IFRS 16 and the impact of changes is disclosed in Note 3.

## **Notes to the financial statements**

For the year ended 31 December 2020

## Policy applicable from 1 January 2019

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of identified asset- this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- the Company has the right to obtain substantially all the economic benefits from the use of the asset throughout the period of use; and
- the Company has the right to direct the use of the asset. The company has the right when
  it has the decision-making rights that are most relevant to changing how and for what
  purpose the asset is used. In rare cases where the decision about how and for what
  purpose the asset is used is predetermined, the Company has the right to direct the use
  of the asset if either:
  - o the Company the right to operate the asset; or
  - o the Company designed the asset in a way that predetermines how and for what purpose it will be used.

This policy is applied to contracts entered into or changed, on or after 1 January 2019.

## The Company as a Lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

The Company recognises a right-of-use asset and a lease liability at the commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before commencement date, plus any initial direct costs attributable to the lease contract and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

# Notes to the financial statements

For the year ended 31 December 2020

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise of:

- Fixed repayment, including in-substance fixed payments
- The effects of prepayments or rent-free periods
- Contractually-stipulated increases in rent payments
- Lease payments in an optional renewal period if the Company is reasonably certain to exercise an exercise option.

The lease liability is measured at amortised cost using the effective interest method. A remeasurement of the lease liability and right-of-use asset is required under the following circumstances:

- (a) A change in future lease payment amount due to a market rent review;
- (b) A change in fixed future lease payment amount due to rent being linked to an inflation index;
- (c) A change in expected lease term (e.g. no longer expect to exercise extension option or now expect to exercise an early termination option).

When the lease liability is re-measured in this way, a corresponding adjustment is made to the current amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use asset in property and equipment and lease liabilities in trade and other liabilities in the statement of financial position.

Short term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases of property that have a lease term of 12 months or less. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

## Policy applicable before 1 January 2019

The Company as a Lessee

The leases entered into by the Company are primarily operating leases. The total payments made under operating leases are charged to the profit or loss on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which termination takes place.

Where the Company is a lessee under finance leases, the leased assets are capitalized and included in property and equipment with a corresponding liability to the lessor recognised in other liabilities.

Financing charges payable are recognised over the period of the lease based on the interest rate implicit in the lease to give a constant periodic rate of return.

## Notes to the financial statements

For the year ended 31 December 2020

## (f) Revenue from contract with customer

Revenue is recognised when the customer obtains control of the fuel storage service provided by the company over time. Revenue is recognised based on the stage of completion. The stage of completion for determining the amount of revenue to recognise is assessed based on the quantity of LPG stored in their facility.

Revenue is measured at the fair value of the consideration received or receivable, net of sales taxes, discounts, and other similar deductions.

### (g) Income tax

Income tax expense comprises current and deferred tax. It is recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

#### Current tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any.

#### Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects either accounting nor taxable profit or loss.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to taxes levied by the same tax authority.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

## Notes to the financial statements

For the year ended 31 December 2020

### (h) Segment reporting

A segment is a distinguishable component of the company that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker (CODM). The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors.

### (i) Employee benefits

Short term benefits

Short term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the company has a present legal and constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Defined contributions plans (Social Security)

Under a National Pension Scheme, the company contributes 13% of employees' basic salary to the Social

Security and National Insurance Trust (SSNIT) for employee pensions under the terms of the Pension Act 2008 (Act 766). The company's obligation is limited to the relevant contributions, which have been provided in these financial statements. The pension liabilities and obligations, however, rest with SSNIT.

#### (j) Finance income and finance cost

The Company's finance income and finance cost includes interest income on funds invested or held in bank accounts, interest expenses on borrowings, foreign currency gain or loss on borrowings, bank charges and unwinding of day-one gains or losses arising on fair vale measurement

Interest income and expense is recognised, as it accrues in profit or loss, using the effective interest method.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instruments to the gross carrying amount of the financial asset or the amortised cost of the financial liability.

#### (k) Earnings per share

The company presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the company by the weighted average number of ordinary shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

## Notes to the financial statements

For the year ended 31 December 2020

## (I) Stated capital

Ordinary shares

Proceeds from issue of ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from stated capital.

#### (m) Subsequent events

Events subsequent to the reporting date are reflected only to the extent that they relate directly to the financial statements and the effect is material.

## (n) Operating profit

Operating profit is the result generated from the continuing principal revenue-producing activities of the Company as well as other income and expenses related to operating activities. Operating profit excludes net finance costs and income taxes.

## (o) Capital work in progress

Property, plant and equipment under construction is stated at cost. Property, plant and equipment under construction are depreciated from the date the asset is made available for use over its estimated useful life. Assets are transferred from capital work in progress to an appropriate category of property, plant and equipment when commissioned and ready for its intended use.

## (p) New standards and interpretations not yet adopted

At the date of authorisation of the financial statements of the Company for the year ended 31 December 2019, the following Standards and Interpretations were in issue but are effective for annual periods beginning after 1 January 2019 and earlier application is permitted; however, the Company has not early adopted them in preparing this financial statements. Those that are relevant to the Company's financial statements are:

Standard/Interpre	tation	Effective date Periods beginning on or after
Conceptual	Amendments to References to Conceptual	1 January 2020
Framework	Framework in IFRS Standards	
IAS 1 and IAS 8	Definition of Material	1 January 2020

## **Notes to the financial statements**

For the year ended 31 December 2020

#### Amendments to References to Conceptual Framework in IFRS Standards

#### Conceptual Framework

The IASB decided to revise the Conceptual Framework because certain important issues were not covered and certain guidance was unclear or out of date. The revised Conceptual Framework, issued by the IASB in March 2018, includes:

- A new chapter on measurement;
- Guidance on reporting financial performance;
- Improved definitions of an asset and a liability, and guidance supporting these definitions;
   and
- Clarifications in important areas, such as the roles of stewardship, prudence and measurement uncertainty in financial reporting.

The IASB also updated references to the Conceptual Framework in IFRS Standards by issuing Amendments to References to the Conceptual Framework in IFRS Standards. This was done to support transition to the revised Conceptual Framework for companies that develop accounting policies using the Conceptual Framework when no IFRS Standard applies to a particular transaction.

Although we expect this to be rare, some companies may use the Framework as a reference for selecting their accounting policies in the absence of specific IFRS requirements. In these cases, companies should review those policies and apply the new guidance retrospectively as of 1 January 2020, unless the new guidance contains specific scope outs.

The Company does not intend to use the Framework as a reference for selecting its accounting policies in the absence of specific IFRS requirements and therefore does not expect this to impact the Company significantly.

## Definition of Material (Amendments to IAS 1 and IAS 8)

The IASB refined its definition of material to make it easier to understand. It is now aligned across IFRS Standards and the Conceptual Framework.

The changes in Definition of Material (Amendments to IAS 1 and IAS 8) all relate to a revised definition of 'material' which is quoted below from the final amendments.

Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity."

The Board has also removed the definition of material omissions or misstatements from IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors.

The amendments are effective from 1 January 2020 but may be applied earlier. However, the Board does not expect significant change – the refinements are not intended to alter the concept of materiality and would, therefore, not have a significant impact on the Company.

## Notes to the financial statements

For the year ended 31 December 2020

#### 5. Determination of fair values

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price.

Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out. If transaction is with the Shareholder, then the difference between the transaction price and the fair value is recognised directly in equity.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

Some of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. The Company regularly reviews significant unobservable inputs and valuation adjustments. When measuring the fair value of an asset or liability, the Company uses market observable data as far as possible. Fair values are categorised into different levels in the fair value hierarchy based on inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset and liability that are not based on observable market data (unobservable inputs).

# **Notes to the financial statements**

For the year ended 31 December 2020

If inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognized transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in determining fair values is included in note 20 financial instrument – fair value and risk management.

## **Notes to the financial statements**

For the year ended 31 December 2020

#### 6. Revenue

Throughput Fees:	2020 GH¢	2019 GH¢

Net finance cost	(7,209,675)	(13,882,200)

# Notes to the financial statements

For the year ended 31 December 2020

The imputed interest relates to the interest income on the interest-free related party receivables in note 18(cii). The amount was derived by multiplying the present value of the receivables by the market rate of interest of 20% on the cedi receivable and 10% on the dollar receivable. This interest is non-cash and not receivable. The imputed interest amount increases the amortised cost of the receivable as at the year-end.

## Notes to the financial statements

For the year ended 31 December 2020

#### 12(b) Leases

#### (i) Leases as a lessee

The Company leases land and buildings. The land leases typically run for a period of 50 years and buildings for a period of one to two years. For lease of buildings that run for a period of one year, the Company has elected not to recognise right-of-use and lease liabilities for these leases because they are short-term leases.

#### (ii) Right-of-use assets

Right-of-use assets

Right-of-use assets are presented as part property, plant and equipment.

31 December 2020	Land GH¢	Buildings GH¢	Total GH¢

In 2015 the Company began the process of raising additional capital for the purpose of;

- Refinancing existing debts secured from Standard Chartered Bank used to construct the facility
- Expanding the Facility including the construction of truck park and
- Investing in new business locations

The required capital was secured in debt from two sources as described below.

The securities provided for the bond include debenture over all the QTPLC assets and plant and machinery, Mortgage over the QTPLC land and all charged accounts on a pari passu basis with the EAIF loan in 'b' below.

Carrying amount of total assets pledge as security for liabilities 195,704,763 199,354,287

### a. Ghana Fixed Income Market Bond (GFIM) Bond

The company issued a bond of GH $\phi$  45,000,000 in March 2018 on the Ghana Fixed Income Market (GFIM) for a period of (10) years. The bond was partially (75%) guaranteed by Guarantco, a member of Private Infrastructure Development Group (PIDG) which has the objective of assisting local firms to overcome constraints in accessing local finance for infrastructure development.

The GFIM bond attracts a coupon rate of 22.250% per annum and payable every six (6) months. There is also a guarantee fee of 4% per annum (which will reduce to 3.5% in three years) on the 75% of the loan outstanding payable on quarterly basis. The principal repayment of GH¢ 5,000,000 commenced in March 2020 and payable annually ending in March, 2028. The effective interest rate on the bond is 29.96%.

#### b. Emerging Africa Infrastructure Fund (EAIF) Loan

The company obtained a long term loan facility of USD 10,000,000.00 from EAIF in December 2018 for a period of (10) years.

The EAIF loan interest is variable and calculated as margin plus 6-month LIBOR. The margin is dependent on the leverage ratio the company achieves at each calculation date and it's from 7% to 10%.

## Notes to the financial statements

For the year ended 31 December 2020

The current margin for the interest payable in March 2020 was set at 8.5% and the LIBOR was 0.269% given a total interest rate of 8.769%. The interest is payable every six (6) months. The principal amount of US\$ 555,555.56 is repayable semi-annually ending in March, 2028. The current effective interest rate on the loan is 12.56%.

The securities provided for the loan includes debenture over all QTPLC assets and plant and machinery, Mortgage over the QTPLC land and all charged accounts on a pari passu basis with the GFIM bond in 'a' above.

# c. Reconciliation of movements of liabilities to cash flows arising from financing activities

The reconciliation represents the movement in the principal amount of loans and borrowings and movement in leases

The holders of ordinary shares are entitled to receive dividend as declared from time to time and entitled to one vote per share at meetings of the Company.

There is no share in treasury and no call or instalment unpaid on any share.

#### (b) Deposit for Shares

The Quantum Terminals Group Limited made a deposit for shares in 2017 amounting to GH¢ 47,292,758. The necessary formalities required to issue the shares were yet to be completed at the reporting date.

## Notes to the financial statements

For the year ended 31 December 2020

#### (c) Revaluation reserve

The revaluation reserve relates to revaluation of property, plant and equipment are set out below:

Balance at 1 January Revaluation of property, plant and equipment, net of tax	2020 GH¢ 58,159,327	2019 GH¢ 63,862,283
Transfer to retained earnings	(5,425,467)	(5,702,956)
Balance at 31 December	<u>52,733,860</u>	58,159,327

This is not available for distribution except when there is a sale of the assets by the asset owners.

#### (d) Retained earnings

This represents the residual of cumulative annual profits or losses that are available for distribution to shareholders.

In addition, the retained earnings have been adjusted with the difference between the face value and the present value of the interest free long term intercompany receivables.

Significant components of the retained earnings have been analysed below:

	2020
Cumulative Annual Operating Profits &	GH¢
Revaluation Gain Transfers	39,364,623
Fair Value Adjustment-Initial Recognition	(147,309,114)
Cumulative Annual Imputed Interest on related party receivables	20,487,501
Balance at 31 December	<u>(87,456,990)</u>

#### (e) Fair valuation reserve

This represents the difference between the transaction price of interest-free related party loans receivable and the fair value at initial recognition. The amount of imputed interest unwound on the related party receivables for the period and recorded in profit or loss is also transferred from the fair valuation reserve to retained earnings. The fair value reserve will reduce progressively to zero (0) by the end of the tenth  $(10^{th})$  year.

The opening balance for this reserve was reclassified to retained earnings in the current year.

## Notes to the financial statements

#### 20. Financial risk management

#### **Overview**

The company has exposure to the following risks from its use of financial instruments:

- · credit risk
- liquidity risk
- market risks

These risks have been explained below together with the necessary measures put in place by management to mitigate the impact of such risks on the company.

#### Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the company's risk management framework. Management of the company also has the responsibility for developing and monitoring the company's risk management policies.

The company's risk management policies are established to identify and analyse risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the company's activities.

The company's Board of Directors is responsible for monitoring compliance with the company's risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to the risks faced by the company.

#### (i) Credit Risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Credit risks arises from cash and cash equivalents and deposits with

banks and financial institutions as well as credit exposure to customers and related parties. The Company's exposure to credit risk is minimised as all revenue are generated from Sage Distribution Limited, a related company. The Company has transacted business with this entity over the years and there has been no default in the payment of outstanding debts.

The carrying amounts of financial assets represent the maximum credit exposure.

## Notes to the financial statements

For the year ended 31 December 2020

Maximum exposure to credit risk are as follows		
	2020 GH¢	2019 GH¢
Amount due from related parties Trade receivables Other receivables Other assets Cash and cash equivalents	58,739,192 5,820,925 805,382 9,578,356 <u>11,591,564</u>	52,820,599 3,383,309 926,233 8,876,085 18,470,677
	<u>86,535,419</u>	<u>84,476,903</u>

The trade receivables includes impairment loss allowance of GH¢40,736 (2019: GH¢21,504). This excludes prepayments.

#### Impairment losses

Impairment loss on financial assets recognised in profit or loss were as follows.

Impairment gain/(loss) on trade receivables Impairment gain/(loss) on amounts due from related parties	2020 GH¢ (19,232) (51,040)	2019 GH¢ 13,739 <u>801,840</u>
	<u>(70,272)</u>	<u>815,579</u>

The movement in the allowance for impairment in respect of trade receivables and amount due from related parties are as follows.

2020	Trade Receivables	Amount due from related parties	Total
	GН¢	GH¢	GH¢
Balance at 1 January	21,504	455,511	477,015
Additional impairment loss allowance	19,232	51,040	70,272
	<u>40,736</u>	<u>506,551</u>	<u>547,287</u>
2019	Trade Receivables	Amount due from related parties	Total
	GН¢	GH¢	GH¢
Balance at 1 January	35,243	1,257,351	1,292,594
Reversal of impairment loss allowance	(13,739)	(801,840)	(815,579)
	21,504	<u>455,511</u>	477,015

Amount due from related parties

The company recognised impairment allowance of GH $\$  506,551 as at 31 December 2020 (2019: 455,511).

## Notes to the financial statements

For the year ended 31 December 2020

The company used a probability of default (PD) of 1.90% based on Moody's annual default rating and Loss Given Default (LGD) parameter of 45%. In management's assessment the LGD of 45% is the possible future loss the company is likely to incur in the event of default. This assessment resulted in an impairment allowance of  $GH\+ 506,551$  as at 31 December 2020. The expected credit loss of  $GH\+ 51,040$  was added in 2020 due to the increment in impairment loss.

#### Trade receivables

Expected credit loss assessment for individual customers as at 31 December 2020 is GH¢ 40,736 (2019: 21,504).

The company uses an allowance matrix to measure the Expected Credit Loss (ECLs) of trade receivables from its customer. Loss rates are calculated using the roll rate method based on the probability of receivable progressing through successive stages of delinquency of write- off. An increment in impairment loss of GH¢19,232 was recognised during the year resulting in a total impairment loss of GH¢40,736 as at 31 December 2020.

The following tables provides information about the exposure to credit risk and ECLs for trade receivables from its customer.

#### As at 31 December 2020

	Weighted average loss rate	Trade receivables GH¢	Impairment allowance GH¢	Credit impaired
Current	0.53%	4,037,334	21,398	No
1-30 days past due	1.06%	1,824,327	19,338	No
Total		5,861,661	40,736	

#### As at 31 December 2019

	Weighted average loss rate	Trade receivables GH¢	Impairment allowance GH¢	Credit impaired
Current	0.53%	2,752,267	14,587	No
1-30 days past due	1.06%	652,546	6,917	No
Total		3,404,813	21,504	

Loss rates are based on actual credit loss experience over the past three years. These rates are multiplied by factors to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Company's view of the economic conditions over the expected lives of the receivables. The factors considered include gross domestic product and inflation rate.

#### Other receivables

The Company has determined that no expected credit loss will be recognised on amounts due from related parties because the expected credit loss is not significant to the financial statements.

## Notes to the financial statements

For the year ended 31 December 2020

#### Bank balance and other assets

For banks and financial institutions, only reputable banks are accepted by the company for its banking transactions. The company is not exposed to credit risks from its operating activities and banking activities. The company did not recognise any impairment allowance as at 31 December 2020 (2019: Nil).

#### (ii) Liquidity risk

Liquidity risk is the risk that the company either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access them only at excessive cost. The company's approach to managing liquidity is to ensure that it will maintain adequate liquidity to meet its liabilities when due. The Company monitors the level of expected cash inflows on trade and other receivables together with expected cash outflows on borrowings, trade and other payables.

The following are contractual maturities of financial liabilities at the reporting date

#### 31 December 2020

#### (iii) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. Majority of the company's transactions are denominated in US\$ hence a way of the firm managing its market risk.

## Notes to the financial statements

For the year ended 31 December 2020

#### (a) Currency risk

The company is exposed to transactional foreign currency risk on purchases that are denominated in currencies other than the functional currency. The currency in which these transactions are primarily denominated is US Dollar (US\$). Management currently does not have any currency risk management practices in place to manage exposure to this risk.

The company's exposure to foreign currency risk was as follows based on notional amounts

Assets	31/12/20 US\$	31/12/19 US\$
Trade and other receivables	1,017,102	614,976
Due from related parties	4,681,243	4,254,739

#### Rates of exchange (ROE)

,	Average F	Average Rate		ot rate
	2020 GH¢	2019 GH¢	2020 GH¢	2019 GH¢
US\$ to GH¢	<u>5.6000</u>	<u>5.2177</u>	5.7631	<u>5.5365</u>

#### Sensitivity analysis

A reasonably possible strengthening or weakening of the US dollar as at 31 December 2019 would be affected by the measurement of financial instruments denominated in foreign currency and affected equity and profit or loss by the amounts shown below. The analysis assumes that all other variables, in particular interest rates remains constant and ignores impact of forecast sales and purchases. The analysis is performed on the same basis for 2019.

## Notes to the financial statements

For the year ended 31 December 2020

As of 31 Dec		2020			2019	
In GH¢	% Chang e	Statement of comprehensive income impact: Strengthening	Statement of comprehensiv e income impact: Weakening	% Change	Statement of comprehensiv e income impact: Strengthening	Statement of comprehensiv e income impact: Weakening
		GH¢	GН¢		GH¢.	GН¢
USD	4.1%	(430,950)	430,950	14.8%	(2,385,773)	2,385,773

As of 31 Dec		2019		2018		
In GH¢	% Change	Equity, net of tax: Strengthening	Equity, net of tax: Weakening	% Change	Equity, net of tax: Strengthening	Equity, net of tax: Weakening
		GН¢	GН¢		GH¢	GH¢
USD	4.1%	(323,213)	323,213	14.8%	(1,789,330)	1,789,330

#### (b) Interest rate risk

Interest rate risk is the exposure of current and future earnings and capital to adverse changes in interest rates. The Company currently has long term financial instruments that would be susceptible to interest rate risks. Management currently does not have any interest rate risk management practices in place to manage exposure to this risk. At the reporting date the interest rate profile of the Company's interest- bearing financial instruments were:

	2020 GH¢	2019 GH¢
Variable rate instruments	43,647,724	48,142,511
Fixed rate instruments	<u>32,682,090</u>	<u>42,260,450</u>

#### **Cash flow sensitivity for variable rate instrument**

A change of 100 basis points in interest rate at the reporting date would have increased/ (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

## Notes to the financial statements

For the year ended 31 December 2020

31 December 2020	100bp Increase GH¢	100bp Decrease GH¢
Effect on profit or loss Variable rate instrument	(480,258)	480,258
Effect on equity, net of tax Variable rate instrument	<u>(360,194)</u>	<u>360,194</u>
31 December 2019		
Effect on profit or loss Variable rate instrument	<b>GH</b> ¢ <u>(556,716)</u>	<b>GH¢</b> 556,716
Effect on equity, net of tax Variable rate instrument	<u>(417,537)</u>	417,537

#### Cash flow sensitivity for fixed rate instrument

A change of 100 basis points in interest rate at the reporting date would have increased/ (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

31 December 2020	100bp Increase GH¢	100bp Decrease GH¢
Effect on profit or loss Fixed rate instrument	<u>400,000</u>	400,000
Effect on equity, net of tax Fixed rate instrument	(300,000)	300,000
31 December 2019	CHA	CHA
Effect on profit or loss	GH¢	GH¢
Fixed rate instrument	<u>(450,000)</u>	<u>450,000</u>
Effect on equity, net of tax Fixed rate instrument	<u>(337,500)</u>	(337,500)

#### (c) Accounting classifications and fair values

The carrying amounts of the Company's financial assets and financial liabilities are an approximation of their fair values hence no fair value disclosure has been provided in these financial statements. The table below shows the carrying amounts of the Company's financial assets and financial liabilities.

## Notes to the financial statem

For the year ended 31 December 2020

31 December 2020	Carrying amount Financial assets at amortized Cost	Fair value Level 3	Total

Amount due to related parties	530,035	530,035	530,035
Total financial liabilities	88,788,758	<u>88,788,758</u>	<u>88,788,758</u>
31 December 2019	Carrying amount Financial assets at amortized cost	Fair value Level 3	Total
Financial assets not measured at fair value			
Amount due from related parties Trade and other receivables Other assets Cash and cash equivalents	52,820,599 4,309,542 8,876,085 <u>18,470,677</u>	52,820,599 4,309,542 8,876,085 18,470,677	52,820,599 4,309,542 8,876,085 18,470,677
Total financial assets	84,476,903	84,476,903	84,476,903

## Notes to the financial statements

For the year ended 31 December 2020

	Carrying amount Other financial liabilities	Fair value Level 3	Total
Financial liabilities not measured at fair value			
Trade and other payables Loans and borrowings Amount due to related parties	2,810,903 95,226,443 <u>712,931</u>	2,810,903 95,226,443 <u>712,931</u>	2,810,903 95,226,443 
Total financial liabilities	98,750,277	98,750,277	98,750,277

#### Valuation Technique

For all financial assets and financial liabilities not measured at fair value, the discounted cash flows method was used. The valuation model considers the present value of expected payments or receipts, discounted using a risk-adjusted discount rate.

#### Capital Management

The Company monitors capital using the ratio of adjusted net debt to equity. For this purpose, adjusted net debt is defined as total liabilities, comprising interest-bearing loans and borrowings, less deferred tax liabilities and cash and cash equivalents. Adjusted equity comprises all components of equity. The primary objective of the company's capital management policies are to ensure that the company complies with Ghana's regulations as far as public companies are concerned, and that the company operations achieve the returns on gross investment and to maintain a strong capital ratio in order to support its business and to maximise shareholders value.

	2020 GH¢	2019 GH¢
Total liabilities	113,135,135	123,941,382
Less: Cash and cash equivalents Less: Deferred tax liability	(11,591,564) (21,343,027)	(18,470,677) (21,839,531)
Adjusted net debt	80,200,544	83,631,174
Total equity	82,569,628	75,412,905
Adjusted net debt to equity	0.97:1	1.1:1

## Notes to the financial statements

For the year ended 31 December 2020

### 21. Earnings per share (eps)

#### Basic

The calculation of basic EPS has been based on the following profit attributable to ordinary shareholders and the weighted-average number of shares outstanding.

snareholders and the weighted-average humber of shares outs	2020 GH¢	2019 GH¢
Profit /(loss) attributable to ordinary shareholders	<u>7,156,723</u>	(2,277,874)
Weighted average number of ordinary shares in issue	70,000,000	70,000,000
Basic earnings per share (expressed in GH¢ per share)	<u>0.10</u>	(0.03)

#### **Diluted**

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares, to assume of all dilutive potential ordinary shares. At 31 December 2020 and 2019, the company had no dilutive potential ordinary shares.

#### 22. Debt service cover ratio

The debt service cover ratio is used to measure the ability of the company to meet its debt payment obligations during the period. This is the ratio of Adjusted Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA) to The Debt Service Cost falling due during the period. The Debt Service Cover Ratio for the period 2020 was **1.10** times (2019:0.95 times). The company could therefore pay its debt obligations 1.10 times using its earnings for the period. The detailed computation has been disclosed in sub-note a-c.

## a) Adjusted Earnings before Interest, Tax, Depreciation and Amortisation (EBITDA)

The Directors of the Company monitor the performance measure EBITDA and they believe this measure is relevant to gaining an understanding of the Company's financial performance. EBITDA is calculated by adjusting profit from continuing operations to exclude the impact of taxation, net finance costs, foreign exchange differences, depreciation and amortisation.

### Reconciliation of EBITDA to profit from operations

## Notes to the financial statements

For the year ended 31 December 2020

#### B) Debt service cost

,		
Net finance cost Add: Imputed Interest Income on related party receivables Loan exchange difference	2020 GH¢ 7,209,675 8,669,764 (740,795)	2019 GH¢ 13,882,200 7,477,302 (3,923,454)
Less: Non-Cash finance cost Add Principal Repayments Due from earnings	(370,642) <u>6,194,781</u>	(1,292,393) _3,038,697
Total debt service cost	20,962,783	<u>19,182,352</u>
C) Debt service cover ratio		
Adjusted EBITDA (Note 22a) Total Debt Service Cost (Note 22b)	23,583,250 20,962,783	18,159,313 19,182,352
Debt service cover ratio	<u>1.13</u>	<u>0.95</u>

#### 23. Contingent liabilities

The Ghana Revenue Authority carried out a tax audit covering 2014 to 2017 years of assessment. The audit resulted in additional corporate tax liability of  $GH \not= 1,046,288$  which the company disagreed with. The company has duly written to the Authority raising key matters on areas it disagrees with the Authority. The Authority is yet to respond on its final position on the key matters raised by the company. The amount has been disclosed as contingent liabilities pending the final determination of the matter. There were no other contingent liabilities (2019:Nil).

#### 24. Capital commitments

The Company has capital commitments in respect of the purchase of LPG Bulk Road Vehicles tanks to aid in the evacuation of LPG at Anokyi to the tune of GH¢ 1,988,270 outstanding as at the reporting date (2019; GH¢ 1,910,093).

#### 25. Segment reporting

Quantum Terminals PLC has only one reportable segment. Required disclosure information is listed below for this segment.

#### a. Information about reportable segment

	2020 GH¢	2019 GH¢
Revenue Profit / (loss) before taxation Net finance cost Depreciation and amortisation	31,663,288 6,660,219 (7,209,675) 9,643,084	24,439,795 (5,428,469) (13,882,200) (10,521,161)

## Notes to the financial statements

For the year ended 31 December 2020

Other material non-cash items: Impairment (loss)/reversal on related party receivable	(51,040)	801,840
Imputed interest on unwinding of related party receivable	8,669,764	7,477,302
Total assets Total liabilities	<u>195,704,763</u> 113,135,135	199,354,287 123,941,382

#### b. Geographical information

Quantum Terminals PLC operates an LPG storage and loading facility at Anokyi within the Western Region of Ghana. The company's registered office is Plot No. 64A/28 – 32, Tema Industrial Area, Tema.

#### c. Major customer

Total revenue of GH $\ddagger$  31,663,288 is from Sage Distribution Limited, the sole customer of the company (2019: GH $\ddagger$  24,439,795)
